

# HOW TO FIND A JOB IN PUBLIC HEALTH

## Conduct informational interviews

AUGUST

Informational Interviews are meetings to learn about the real-life experience of someone working in a field or company that interests you. This will give you a better idea on whether a job/company suits you! Learn more [here](#).

## Reach out to your networks

SEPTEMBER

Networking is a very powerful tool in securing jobs! Be active on LinkedIn. Ask the people you know if their companies are hiring if you're interested in their line of work. If they aren't hiring, they might know someone who is!

## Update necessary documents and attend career/job fairs

OCTOBER - DECEMBER

Update and target your resume/CV and cover letters for the job you're applying to with relevant experience. Visit career fairs on campus with recruiting event/networking programs. Click to visit the career center [here](#).

## Apply to internships and fellowships

NOVEMBER - JANUARY

Internships/fellowships during the summer can lead to full-time jobs once they're over in the fall! They can also provide you with more public health experience so that you're a better candidate for your desired positions.

## Apply to jobs

JANUARY - MAY

Applying to jobs can be tricky because not all job postings come out at the same time. Students who apply to jobs 6 months before their desired start date get more offers and are able to negotiate for higher salaries!
